Planning your Solution Template

Identify the likely cause(s) of the misbehavior. Consider both the specific misbehavior itself as well as the reaction it engenders in the teacher. Think carefully about student-centered and teacher-centered factors. Determine solutions. Remember that solutions should be student-centered and cause based. They should also assume that the student is capable of appropriate behavior, and recognize behavioral improvement over time.
Consider both the specific misbehavior itself as well as the reaction it engenders in the teacher. Think carefully about student-centered and teacher-centered factors. Determine solutions. Remember that solutions should be student-centered and cause based. They should also assume that the student is capable of appropriate behavior, and recognize behavioral improvement over time. 1.
